Discover social media accounts, email addresses, associated names, profile picture and spam or fraud activities connected to a phone number

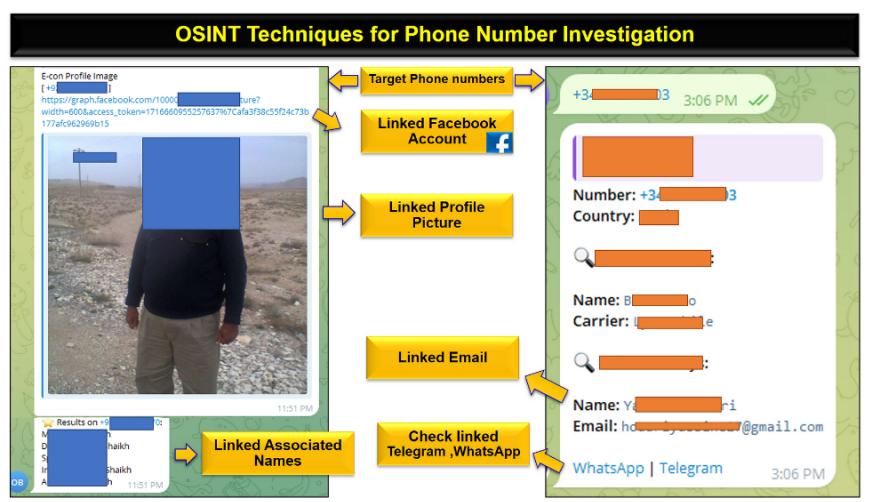

Figure 1. Key Features of Telegram Bots for Phone Number Investigation

Have you ever received a call or text from an unknown number (Local or International) and wondered who it might be? and you would like to know

- The owner's name
- What are their associated names ? Names that other people have saved the target number on their contact list
- Is it connected to Telegram, Facebook, X (Twitter) Profiles etc
- Is it a part of X (Twitter) or Facebook Leaks 2021
- Is it have a linked email address
- Does it have a public profile picture
- Does it have an active WhatsApp account
- Have they been reported for spam or fraud activities

Yes, you can uncover all the listed information about a phone number, ensuring you approach these tools with ethical and legal considerations in mind.

Before getting into the details, let me walk you through the ethical and legal implications first.

Ethical and Legal Practices in OSINT Investigations

It's very important to keep the ethical and legal implications in mind while using these OSINT tools.

Ensure that your investigations comply with privacy laws and ethical standards, respect the boundaries of data use and personal privacy.

Use these OSINT tools in a way that you can justify your

actions ethically or in a court of law, if challenged legally.

AllinOneLeaksBOT

Link. <https://t.me/AllInOneLeaksBOT?start=ELjl-gl>

The screenshot shows two separate search results for leaked data. Each result includes fields such as Telephone, Registration date, Address, City, Full name, IMEI code, IMSI code, CNIC code, Region, and Status. The first result is for a telephone number ending in 9, and the second is for one ending in 4. Both results show active status and provide detailed information like full names and addresses.

Figure 2. AllinOneLeaksBOT

This bot offers access to leaked data across various categories. You can search for information against a phone number, email address, Facebook account (both usernames and ID), X (Twitter) account, Instagram profile, IP address, and much more, as shown in Figure 2.

The screenshot shows a search interface for a phone number. It displays the request (phone number), subqueries executed, number of results, and number of leaks. Below this, it lists several social media accounts found, including Facebook, Twitter, and Instagram profiles, along with their associated contact information like email, telephone, name, and surname. The interface also provides a detailed description of a specific Facebook data breach from April 2021.

Figure 3. Social media accounts and emails linked to a phone number

You can also search for social media accounts and email

address if its linked to your target phone number as shown in Figure 3.

Link. <https://t.me/UniversalSearchEasyBot>

Phone Number to Facebook, Telegram, WhatsApp and active Leaks Bots

FREE bot enables you to check if a phone number is linked to a Facebook , Telegram, Viber and WhatsApp profiles. In addition, it redirects the results to active leaked data bots on Telegram as shown in Figure 6.

Final Thoughts

- **Safety Tip.** If your phone number is found in leaked data, change or remove it from that specific platforms, as it may be exploited for social engineering or cyber-bullying.
- Bot usernames can be changed by their owner or it maybe permanently deleted by Telegram. If you encounter this or any other issue, feel free to leave a comment, I'll assist you with troubleshooting or suggest an alternative solution.
- Lastly, but most important, use the tools ethically and respect others privacy
